INTRODUCTION

IIUM Caring Club is the sole club under CENSERVE that strives to help the orphans towards successful life ahead, academically and spiritually. Mentor-mentee Anak Yatim Caring or MAYANG for short, is the newest installment in the many project conducted by the Caring Club. This new project will be focusing on enhancing the educational level and spiritual knowledge of the orphans by ways of specialized modules created by the members of the Caring Club. The theme is “Strive for Success”, chosen to instill the determination to work hard in order to achieve the targeted goal.

PROJECT OBJECTIVES

This project is conducted so that the Caring Club members can strengthen their ukhuwah with the orphans and to help them to further their understanding on the academic subjects and also on the religious aspects of life. With this, they can incorporate both of these aspects into their daily life and become a better person as a whole. In between, their soft skills will be polished so that they are ready to face the real world and prepared to involve with the society.

ACTIVITIES AND TASKS

This project will be involved five selected orphanages and each orphanage will be visited by members of the Caring Club to act as a mentor to them. There will be two ways in which the programme will be conducted, by tutoring and also evaluation. To start it off, the participant will undergo a special placement test that will determine their current levels so that the module can be tailored to suit.

The tutoring session will be held every fortnight starting right after the placement test. The mentor will guide the participants of each level using the modules created to ensure that they will be able to catch up and understand the subjects well. The mentors will take turn tutoring the orphan so that all will get a chance to exchange their thoughts and knowledge.

The evaluation method involves the observation of the participants’ behavior during their studies. The observation will be done on every session and data will be collected based on their performance. The data will be presented in graphs and from that the mentor will find the best possible solution for each participant.

PROJECTS BENEFICIARIES

In every project that we do, it must bring benefit and positive impact towards the participants, committee and also the outsider. Such as, how the committee and the participants are communicating with each other. For example, what is the first step that the committee does to attract the participants to share on their learning problem. Next, on how the committee itself solve problem to deal with participant's attitude. As we know, not all the participants will give commitment to the programme as some of them are very passive or even very active. Thus, by hook or by crook the committee has to learn how to deal with them and this can act as medium to face the challenge in the career world.

The participants also can overcome their learning problem as the committee will guide them step by step until they understood what they are losing in their studies. Next, the participants also feel appreciated as there a lack of affection. The participants will feel like they are being carried by their brothers and sisters. Thus, they would not feel lonely anymore.

Lastly, this project will also raise the awareness on the existing of the orphans as someone who needs to be taken care of. The community will be attracted to give support and will increase their humanity towards the orphans. Moreover, as a muslim is the majority in this country, this kind of project will attract their attention as has been mentioned in Quran "they ask you, [o Muhammad], what they should spend. Say, "whatever you spend of good is [to be] for parents and relative and orphans and the needy and the traveler. And whatever you do of good – indeed, Allah is knowing of it. "[2;215]. Hence, from this verse we know that in order to be a good Muslim is to treat the orphans well as been mention many times in the Quran. Islam is taking very serious when its deal with the charity of the orphans. Thus, this project can act as a medium for Muslim to treat the orphans as been told by Allah in the Quran.

EXPECTED PROJECT RESULTS

We expect that the participants will have a good understanding in their studies and also in their religious knowledge for their successful future. It is also hoped for that they will have a boost in their soft skill and also self-esteem in order for them to mingle with the society outside. The Caring Club members are also expected to have an improvement in their mentoring technique and a better understanding in the minds of the orphans.

PROJECT TIMELINE

The project will be conducted starting from September until November. The programme will run on Saturday, once in two weeks. The date to run the programme also already selected which are, on 5th and 12th September, 10th and 24 october and lastly, on 7th and 14th November. This programme are aim to start at 2 pm and expected to end at 10pm.
