TRIGONA HONEY FOR HOPES

DATE OF PROJECT:

1 OCTOBER 2017

LOCATION:

SMK SURA, DUNGUN, TERENGGANU

PARTICIPATION:

6 DISABLE STUDENTS

ORGANIZED:

ENACTUS UITM TERENGGANU, CAMPUS DUNGUN

REPORT BY:

5 DECEMBER 2017

1.0 INTRODUCTION

In 2015, we found the problems face by these disable student when we did some activities in their school. One of the problems is the difficulty for them to find jobs after graduating and the difficulties for them to interact with others. We, Enactus Uitm, as a team that want to solve these problem has come out with a project known as Trigona Honey For Hope. First we did our pioneer project in 2016 at Sekolah Menengah Kebangsaan Sultan Omar in Dungun, Terengganu. This project have give positive impact to the selected students and now we have expand our second project in Sekolah Menengah Kebangsaan Sura which also in Dungun, Terengganu.

2.0 PROJECT OBJECTIVE

- Give them experience on how to do bee farming for them to get extra income and experience
- To help disabled students in Smk Sura to change their typical lifestyle
- Additional pocket money for disable students
- Able to communicate well with others
- The disabled students will create new relationships with other community outside the school.
- To overcome the social stigma faced by these disabled students.
- To inspire other disable students

3.0 ACTIVITIES AND TASK

- We do research on the trigona honey bee
- We do activities with the disable students in SMK Sura such as “Program Adik Angkat Enactus” to build a bond between the university students with the teachers and disable students in SMK Sura.
- We approach Khind StarFish Foundation to ask for fund to setup this project
- We launch the opening ceremony of the project
- We selected promising disable student
- We setup the project at the school.

4.0 PROJECT RESULT

- The students become more confident and can interact well with others
- Additional side income & pocket money
- Increase number of trigona honey production in Terengganu
- Increase number of disabled students in SMK Sura taking part in the project
- Expend this project to other disable students.

5.0 PROJECT OUTCOME

This project gave some learning outcome to the disable school student. The first objective, which is to produce independent people is achieved. They can now harvest Trigona Honey by their own. The second objective, which is to produce an entrepreneur also achieved. They are now capable to run, manage their own business and market trigona honey by themselves. They could communicate well with the prospective buyers while marketing the honey. It showed that this project really improved their self-esteem.

Now, they could become as a role model, benchmark or inspirational to other disable school students. This successful project gave a new dimension to the society as the students’ image has been improvised. Their life has change and now become better.

6.0 PROJECT BENEFICIARY

- DISABLE STUDENTS
