INTRODUCTION

Pusat Pemulihan Dalam Komuniti (PDK) is the community-based rehabilitation (CBR). CBR is characterized by its active involvement of persons with disabilities, their families and community support groups and also by its multi-sectorial approach to inclusive development

The objectives of the establishment of to improve the equalization of opportunities and social inclusion of people with disabilities. The approach also requires a synergistic strategic partnership between the government and civil society for the best interest of people with disabilities. In addition, it is to promote community actions towards human rights and sustainability development among people with disabilities. It also can ensure that people with disabilities become assets to their nations.

Khind Starfish Foundation gives opportunity to the students and other parties to work together in reducing inequalities among people with disabilities in the community.

PROJECT OBJECTIVES

To date, the government has proven to fully commit to the welfare and well-being of Malaysia's disabled citizens and has continued to give the necessary support on ensuring that the CBR program provides a meaningful and beneficial service, not only for the disabled but for the community as whole.

- To create a society that included a comprehensive and an inclusive that Disabled people will have the equal opportunities and enjoy full participation
- Enable disabilities persons and their families decision-makers at all levels of community-based rehabilitation programs
- Involve students with the disabled and community services.

ACTIVITIES AND TASKS

Phase I : Training to the PDK community (July 2017)

- Collaborate with the PDK Community (which consists of the disables, teachers and the PDK Committes) on the activities to be held.
- Brief the PDK community on the objectives of the project.
- Introduce them with the module to be applied for the projects.
- Train the PDK community on how to conduct the modules and plantations.
- Train the PDK community on the cost and costing system in producing the mushrooms.

Phase II : Build Mushroom shed (August 2017)

- Build the mushrooms shed together with the PDK Community

Phase III : Put the medium block to the shed (August 2017)

- Put the medium block of the mushroom in the shed
- Collect the mushroom from the shed for usage and selling

Phase IV : Market and Sell the mushroom (September 2017)

- Help the PDK Community on marketing the product and advise them in terms of the product, place, price and promotion.

PROJECTS BENEFICIARIES

The benefits of this program are as below:

1. The PDK community especially the disabled will be able to improve their economic condition. The demand of the mushroom is very high and the current price of RM12 – RM15 per kilogram bring potential income to the PDK Community.
2. The PDK community will be able to cut their household costs. This is because home grown mushroom are often promoted as a way to cut household costs by providing low-cost access to vegetables.
3. The PDK community will gain knowledge and exposure in maintaining good health. Mushrooms contain some of the most powerful natural medicines on the planet. About 100 species are being studied for their health-promoting benefits, and about a half dozen really stand out for their ability to deliver a tremendous boost to your immune system. Studies on mushrooms detailed a wide

variety of health benefits, including: improved weight management, improved nutrition, increased vitamin D levels, and improved immune system function.

4. University students are able to care for the community especially the disabled, as well as improving their interpersonal and communication skills.

EXPECTED PROJECT RESULTS

- The PDK community especially the disabled in the PDK can depends on themselves especially in terms of generating income from growing and selling mushrooms.
- Encourage students blending in with the community especially the disabled citizens.
- Students get the hands-on experienced on how to grow mushrooms and encourage them to involve in agriculture sector.
- Develop entrepreneur skills among the students and the disabled student of PDK.
