

PROJECT FOR HAPPINESS
CENDAWAN TIRAM UNTUK PUSAT
PEMULIHAN DALAM KOMUNITI

Sponsored By:

Summary Projects

This projects brings disables in PDK Happiness where they can grow and consume their homegrown mushroom and we managed to bring the community action towards human rights and sustainability development among people with disabilities. We also help them how to plant the oyster mushroom.

Fund-Raising Efforts

Project Cendawan Tiram Untuk Pusat Pemulihan Dalam Komuniti, succeed to get RM7 000 for Starfish Khind. In efforts to find another fund to complete the budgeting cost, Our team and PDK members manage to get other **RM2 000** from community. All of the fund are in **cash**. The list of The funder are in **Attachment 1** .

Project Details

Oyster Mushroom is very sensitive plant as everybody know. Its easy to be effected with **green mold disease** if the surrounding off plantation is not taken care properly. PDK have done this projects before, but the plantation are **not succeed** because of the place of plantation is **not suitable** for oyster mushroom to grow. Now we manage to get more condusive **shed** rather than use **open space** from previous projects that have be done by PDK. The unanticipated difficulties of the projects happen when we try to install the medium block, then we found that the wood that we use to hang the medium block been **crack** after the installment. We made some **additional support** by adding pillars. Other than that, we do not face any budget constraint as from early we manage to **cut the budget** by deducting RM800 from student expenses and RM500 from marketing and event support. The construction worked well as we hire the local contractor and it just took 3 days to complete. But bad news when we transfer the medium block from PDK Telok Datok, Kuala Langat because the transfer had been delayed many time due to bad weather and it took a long journey and it arrive at PDK Taman Yayasan, Segamat at night. Now this Cendawan Tiram Projects, bring a lot of benefit to PDK because it like a second chance for them to prove that they got something but this time with all the equipment to generate more.

Project Goals

How happy are we as parent if our special child got equipment to study at school?. How teacher at PDK feelings if they have money from this projects to purchase some equipment for this champion child to help them studies?. They are very happy from our first step to PDK for approaching them with our plan to help them. The commitment that PDK gives to us can shows how they are very thankful to all who are involved.

This project give many benefit in short term and also in long term. The PDK community especially for the disabled will be able to improved their economic condition. The demand of the mushroom is very high among customer and seller and current price of RM12- RM15 per kilogram bring potential income to PDK Community. The PDK community will be able to cut their household costs. This is because home grown mushroom are often promoted as a way to cut household costs by providing low-cost access to vegetables. Mushrooms contain some of the most powerful natural medicines on the planet. Studies on mushrooms detailed a wide variety of health benefits, including: improved weight management, improved nutrition, increased vitamin D levels and improved immune system function.

In long term benefit , Pegawai Kebajikan Masyarakat Segamat,Puan Rusyidatul binti Mat Yaacob, plan to bring another two PDK in Segamat to follow this projects and PDK Taman Yayasan will lead the other PDK. So this projects will continuously bring income to the PDK community. In discussion with PDK Coordinator's in Taman Yayasan, that for further plan is to build another shed to generate more harvest and become a supplier in oyster mushroom and to have their own brand. Other than that, profit from selling cendawan tiram can be the capital to help them to commercial theirs student's product.

How I Think.

What change our mind is about perspective about disable because they got better attitude than normal people. They sensitive about time and promise, just think why they and not to us.

Nur Syazwani binti Md Zanuri (Projects Leader)

Such an honour for my team that have been selected to join this projects for happiness. I got a lot of experience dealing with this disable and you can know how they can touch your feeling with their love. Believe me that, if this projects can keep constant,they can be a successful entrepreneur.

PROJECTS FOR HAPPINESS 2017
